Master of Education
Grace College

The Grace College Graduate Education Program is designed to assist teachers to become moral professionals and expand their influence in their classrooms, schools, and communities.

This program is based on the assumption that highly qualified teachers must continue to learn and improve their own practice and that teachers must be active in planning their own development.

Practical and Principled
The M.Ed. program is designed with the classroom teacher in mind. While all learning is research-based, the goal is that you are learning useful, practical skills that will directly improve your teaching and lead to increased student learning. We passionately believe that professional growth and development should be solidly grounded in research, but that we must never lose sight of practical application.

Firsthand Feedback

"As a first-year teacher and a Master’s student, I am thankful for the wisdom and expertise of my classmates and professors. They continually help me to grasp new concepts and to identify real-world strategies that I can implement in my classroom."

Daniel Hopkins
Class of 2013

"The professors strive to make sure the program is applicable to each student. We are expected to tailor the assignments to our needs so that we can apply them to our own classrooms. Meaningful experiences and real-life examples are at the heart of the program."

Megan Flick-Katip
Class of 2011

Specialization
You will study with professors who are knowledgeable in instruction, assessment, diversity, and technology. Assignments and projects provide you with opportunities to develop specialized knowledge and skill.

A Graduate Degree that Fits Real Life
You will be able to balance work, family, and social obligations participating in a graduate program that fits real life, thanks to our online courses.

What you learn in these online graduate courses you will apply to your classroom experience as you complete this 36 credit hour/2-year program.

This balance of real world application and intellectual exploration make this program a compelling choice for earning your graduate degree in education.

Open Enrollment
Applications are being accepted right now.
