

Grace College
2018
FIRST DESTINATIONS REPORT

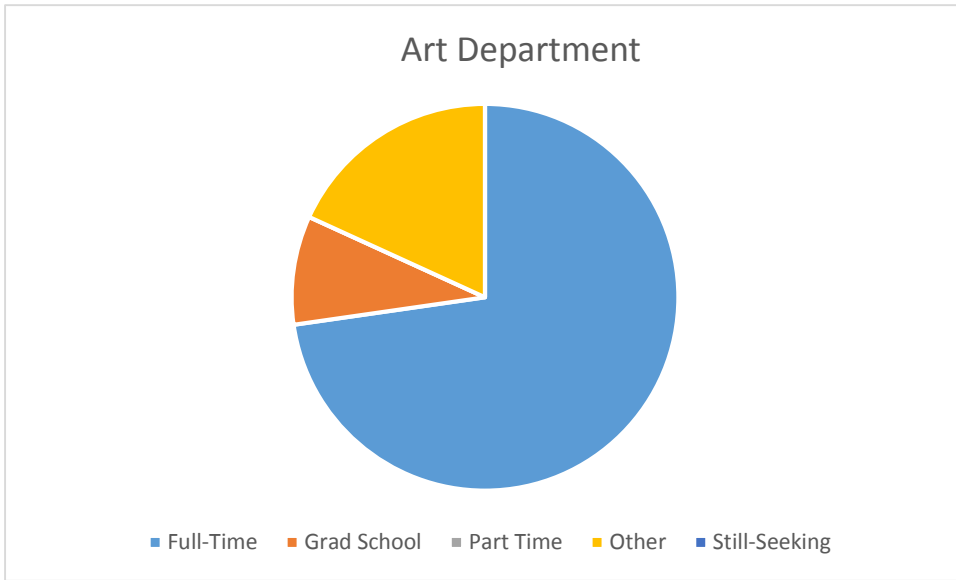

Undergraduate

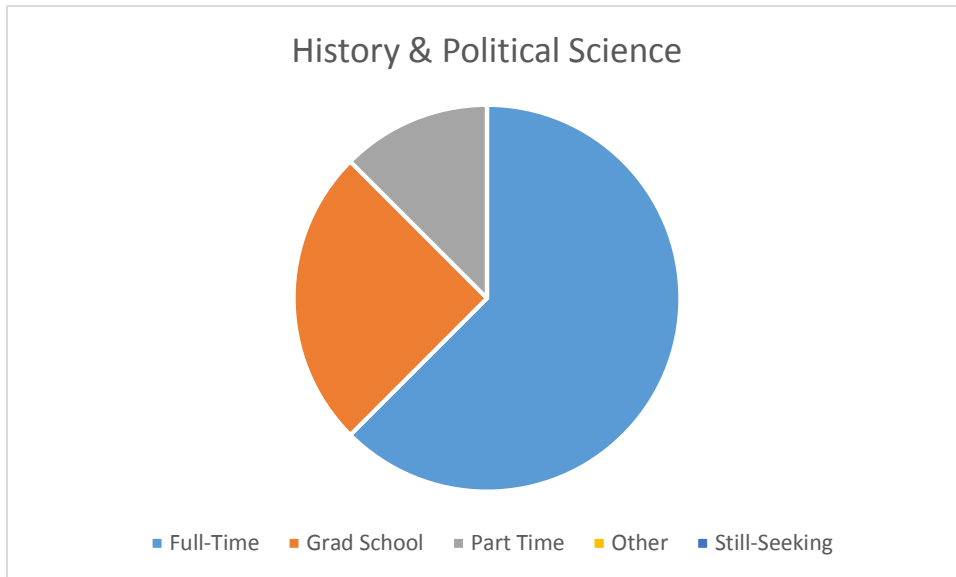

2018	
Number of Responses	238
Level of Excellence	85%
Level of Success	94%
Full-Time	166 / 70%
Grad School	36 / 15%
Part Time	22 / 9%
Other	8 / 3%
Still-Seeking	6 / 3%

The following is a list of definitions pertaining to the charts listed below.

The **Level of Excellence** is derived from graduates who reported being Full-Time Employed as well as those who are attending Graduate School, while **Level of Success** further includes graduates who are Part-Time Employed. Respondents were only given one choice in response and therefore the resulting charts indicate the “type” of post-graduate activity they deem most relevant to them. Because a number of graduates major in more than one discipline, results are a duplicated count, including graduate results from each identified major. The **Number of Responses** is the total number of graduates who responded to the survey identified as representing a particular department. **Full-Time** refers to the number of graduates in that department who obtained a full-time position (30+ hours per week) after graduation; those who selected **Part-Time** obtained a position of less than thirty (30) hours per week. **Graduate School** refers to the graduates who applied and were accepted into, or were planning to attend, graduate school. Other is a culmination of additional categories, including: **Post-Graduate Internship or Fellowship, Mission, Gap Year, or other service experience, not seeking, and Military Service**. Finally, those who referred to themselves as **Still-Seeking Employment** were the graduates who responded to the survey, but have yet to realize an identifiable first destination within six months of graduation. Data was collected via a self-report survey, research from LinkedIn and Facebook media platforms.

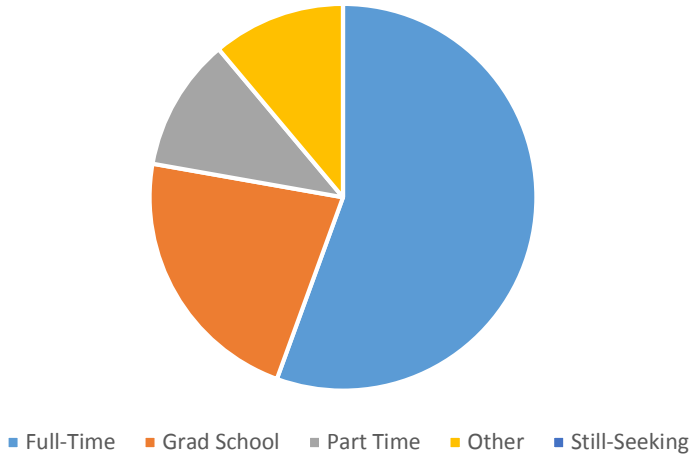

2018	
Number of Responses	11
Level of Excellence	82%
